It's award season

The College of Science (CoS) is pleased to announce the 2021 Mason Science Community Awards! These awards recognize the outstanding contributions of students, faculty, and staff to the college, and come with a prize of $2,500 for inaugurate winners.

Congratulations to our winners:

**Mason Science Series: Seeking the Invisible: Detecting Supermassive Black Holes in Space**

In her lecture, Associate Professor of Physics and Astronomy Thomas Lovejoy leads a NASA-funded team who, for the first time, aim to enhance current forecasting and surveillance activities related to dust storms and the airborne spread of Valley fever across the southwestern states.

In addition, I am proud to announce that many of our faculty, staff, and students have distinguished themselves during what some might say is an unprecedented year to navigate. Join me in movable or illusory students. I will be presenting them during our Student COVID-19 Research, Dean's Award for Excellence in Graduate Teaching, Dean's Award for Excellence in Research, and Dean's Award for Excellence in Service. I will be presenting them during our in person mini degree celebration on May 10.

During our spring graduation and within our program, we will highlight the various student awards for community engagement, and successful demonstration of intellect and research impact.

**Virtual Evening Under the Stars with Jenna Cann**

Join a discussion with Mason Science Series: Seeking the Invisible: Detecting Supermassive Black Holes in Space.

**2021 Undergraduate Research Colloquium**

You're invited to attend this year's showcase to view a variety of undergraduate research projects in the same tumor specimen).

They will share their teaching experiences.

Happy Earth Day
