Playing with a Dream Team

Kathryn Holguin’s research focuses on developing sustainable alternatives to lithium-based batteries—looking specifically at designing batteries with safer and more sustainable cathodes. Kathryn is a PhD candidate in Chemistry at George Mason University. She recently received her B.S. in Chemistry from the University of Texas at San Antonio. Her research has won multiple awards, including the Sikh Nicholas Gold Medal and the Lebanese President’s Prize for Innovation in Chemistry. Kathryn is also a 2020 Mason Science undergraduate of the Year and 2019 Watson Fellow. As an advocate for diversity, equity, and inclusion, Kathryn is an active member of the Mason Latinx Student Alliance, the Women in Science working group, and the Student Diversity Coalition. Kathryn is thrilled to be working in the field of sustainable energy research and strives to make a positive impact on the world’s energy landscape.

In this issue, we highlight the achievements of our students, faculty, and staff. We also congratulate the winners of our annual awards and recognize the important contributions of our researchers. As always, we are committed to providing our community with informative and engaging content. Thank you for your continued support of Mason Science.

Message from the Dean

Dear Mason Science Community,

We are proud to announce the winners of our annual awards, recognizing the outstanding achievements of our students, faculty, and staff. Congratulations to all of our award recipients, who have demonstrated exceptional dedication and excellence in their work.

We also want to recognize the important contributions of our researchers. Their work is helping to shape the future of science and technology, and we are grateful for their contributions.

Thank you for your continued support of Mason Science.

Sincerely,
[Dean's Name]
