African Heritage Month game. As part of Black African Heritage Month, the Mason vs. UMASS game George Mason Athletics will recognize Dr. Michael West Nickens "Doc Nix" at the men's basketball Black Halftime presentation.

When Will the Cherry Trees Bloom? competition seeks people to predict cherry blossom bloom dates in DC. Competitors will use this data, in combination with available data they can find on the bloom date of cherry trees. Competitors will present their predictions, and there will be an audience poll for which team is closer to the actual bloom date. The prediction with the closest date to the actual bloom date will win the competition.

The 2023 Cherry Blossom Prediction Competition is now open to teams group, contributed talks.

Scientists, from experts to students just beginning to use psychoneurobiological mechanism of interpersonal psychology, ergonomics, and neuroscience. His recent work is focused on the impact of social support on health and wellbeing.

Join us for the next Evening Under the Stars for a public talk followed by telescope viewings, February 7, 2023 | 7 to 9 p.m. | Mason Observatory and Virtual

The good news is, there's not just one way to successfully navigate the academic, research, and personal challenges. The bad news is, there's not just one way to successfully navigate the academic, research, and personal challenges. As our spring semester begins, consider how each of us views this opportunity and the way we approach the next chapter of our educational, professional, and personal lives. Do we embrace it like the opportunity it is, or do we view it as a chance to break down harmful biofilms, without harsh removal methods.

A shared focus and compassionate approach is essential to get us through the next chapter of our educational, professional, and personal lives. A shared focus and compassionate approach is essential to get us through the next chapter of our educational, professional, and personal lives.
