Dear Blog, Proud of our team

Last week, the Potomac Environmental Research and Education Center (PEREC) received its 120th scientist, Thomas Lovejoy. Lovejoy has conducted environmental research in the Brazilian Amazon for several years.

Dr. Lovejoy is a Senior Fellow at the Potomac Environmental Research and Education Center, and he became the first Mason College of Science faculty inducted into the National Academy of Sciences. Lovejoy said, "I couldn't be prouder of my team." When discussing the accomplishment during a post-race interview, in addition to acknowledging the importance of the victory for Kentucky Derby fans, Bob Baffert, the trainer of the winning horse, also said, “I couldn't be prouder of my team.”

Lovejoy, who coined the term “biodiversity” and was recently interviewed on the CBS News program about changes to the Amazon rainforest, said, “The Amazon rainforest may have been under threat, but we’re not there yet. The Amazon rainforest is a treasure, and we need to protect it.”

Baffert also said, “It was a great day for racing, and I was happy to see the community come together to support the horse racing industry.”

When discussing the accomplishment during a post-race interview, Baffert also said, “It was a great day for racing, and I was happy to see the community come together to support the horse racing industry.”

Last week, many across America watched the 147th Running of the Roses, the Kentucky Derby, driven by renewable energy and nature-based solutions as a way to combat global warming. Lovejoy, who was recently elected to the National Academy of Sciences recognizing his numerous and significant contributions to conservation biology, said, “It was a great day for racing, and I was happy to see the community come together to support the horse racing industry.”

Dr. Lovejoy also received a Teaching Excellence Award from the Stearns Center at the Department of Environmental Science and Policy. Dr. Lovejoy said, “It was a great day for racing, and I was happy to see the community come together to support the horse racing industry.”

This research is led by Pat Gillevet, Jennifer Salerno, and Linda Hinnov. Research is funded by the GMU COVID Foundation and Director of K-12 Education and Outreach, and the GMU COVID Foundation and a Dean’s Blog: Proud of our team
