High school students will participate in STEM workshops as well as enhancement sessions including college orientation and fully prepares you for life as a Mason Science student. Transfer students are invited to join us for an interactive, virtual bridge session that builds on New Student Transfer Science Bridge 1 (virtual) August 6, 2021 | 10:30 a.m. to noon

Participants (6 through 8 graders) engage in four different interactive and hands-on STEM workshops and on August 2, 2021 to August 6, 2021.

In trying to understand our deceptive universe, Astrophysicist Hakeem Oluseyi examines spacetime, the illusion of mass, the large-scale structure of the universe, dark matter, and dark energy. July 12, 2021 | 6:30 to 8 p.m.

Smithsonian Associates Lecture: "Our Deceptive Universe"

The cycle of life of the Earth-Moon system is the focus of Linda Hinnov’s research. On March 12, 2020, I walked out of my office, a bit early since we were told we were going into lockdown (for three to four weeks max they estimated). I haven't set foot in that office since. Actually, I got a new job here at Mason that started just over a year ago, which I have largely done remotely. Let's face it, the initial disruption was not easy. Yet, after a while, many of us found ways to leverage this new flexibility (no more commute around here is a big deal and saves tons of time). Yet, new ways to work have been quite real (has it kicked in for you too?).

What is your new normal?

For most of us, our lives were upended by COVID-19. After the initial shock and concerns regarding lockdown (for three to four weeks max they estimated). I haven't set foot in that office since. Actually, I got a new job here at Mason that started just over a year ago, which I have largely done remotely.
