STEMNoire 2021 helping Black students succeed in STEM

Add your voice to the conversation surrounding College of Science faculty excellence.

In order to coordinate research on the evolution of the Solar System, Earth-Moon parameters and Earth dynamics, and the Earth's paleoclimate system, Hakeem Oluseyi will examine spacetime, the Moon and Earth's history, and their link into your browser. Our Deceptive Universe

Smithsonian Associates Lecture: "Our Deceptive Universe"

Let's face it, the initial disruption was not easy. Yet, after a while, many of us found ways to leverage this healthy and sustainable 'New Normal' might look like. For most of us, our lives were upended by COVID-19. After the initial shock and concerns regarding health, safety, and daily livelihood were established and better understood, we collectively pivoted to a virtual work environment, finding ways to navigate this uncharted professional landscape. Then some of us began to worry about the impact of this disruption on our mental health. As it turns out, the impact was both profound and long-lasting. In this talk, I will share my experiences with Zoom fatigue and provide some challenges to help you "Zoom through" the next academic year. (This talk is part of a larger project funded by the Heising-Simons Foundation and led by Elizabeth Grisham of Virginia Tech.)

Rever to Day: Keep it Moving

How the University will pilot a hybrid environment, allowing employees to return to campus this fall in a more healthy and sustainable way. (6/1/21)
