Dear John,

As a member of the UC Santa Barbara community, I hope that you, your family, and friends are staying healthy and safe during this challenging time.

I want to take a moment to let you know how much we appreciate you and all of our other graduate students. During this unprecedented time of uncertainty, our students continue to receive the same great world class education that you and your family have come to expect from UC Santa Barbara. We have created a set of guidelines for our students to follow while they remain in the Santa Barbara community, and we are working to provide all of their regular services via email and Zoom calls.

Some specific actions we have taken include:

- All on-campus research has been shut down. This is obviously having a large impact on our graduate student community and we are working to assist them in this difficult period.
- Spring Quarter courses are primarily online with some face-to-face meetings in compliance with state guidelines. Additional on-campus classes are being offered in the Fall Quarter.
- The office, UC Santa Barbara is offering only remote instruction for the Spring Quarter.
- The UC Santa Barbara Office of Graduate Admissions and the Graduate Division are working hard to assist them in this difficult period.
- The UC Santa Barbara Office of Graduate Admissions has postponed the on-campus GRE exams.

We are working to provide a safe, healthy, and supportive environment so that our graduate students can continue their studies during this time.

We are all doing our part to prevent the next pandemic. We are grateful for the support that you provide and the difference that you make.

Sincerely,

Dr. Carol Genetti
Anne and Michael Towbes Graduate Dean

A Message from Dean Genetti

Thank you for your interest in the UC Santa Barbara online Graduate Certificate in Data Science.

The online Graduate Certificate in Data Science at UC Santa Barbara is a collaborative program between the College of Letters & Science and the College of Engineering & Physical Sciences. This certificate is designed for working professionals who want to enhance their skills in data analysis and data science.

The program's curriculum includes 12 units of coursework in areas such as data management, data mining, and data visualization. Students can choose to focus on either a business or technical track.

The program's coursework is offered online, allowing students to fit their studies into their busy schedules. Students have the option to complete the program in as little as 12 months.

To apply, students must submit an online application, a resume or CV, and a statement of purpose. The deadline for fall admission is August 1.

For more information, visit the UC Santa Barbara website or contact us at data-science@ucsb.edu.

Sincerely,

Dr. Carol Genetti
