Fairfax, VA | 22030 US

The ISE Newsletter provides up-to-date information on conferences, funding opportunities, and pressing sustainability and resilience challenges. The biweekly newsletter aims to facilitate information sharing among researchers, practitioners, and relevant local, national, and international organization.

The Institute for a Sustainable Earth (ISE) is a collaborative research institute that connects and supports researchers and practitioners working in the areas of environmental science and sustainability. The ISE promotes interdisciplinary research that applies scientific and engineering principles to address environmental, social, and economic challenges.

The ISE aims to bridge the gap between research and implementation by connecting researchers with practitioners and policymakers. The ISE’s mission is to foster a culture of sustainability and resilience, where actions are taken to protect the planet and support human well-being.

The Institute for a Sustainable Earth (ISE) is part of George Mason University, a public research university located in Fairfax, Virginia. The university is committed to excellence in teaching, research, and service.

The ISE provides capacity development and research programs to support sustainability initiatives. These programs include the Marine Debris Prevention Program, which aims to reduce marine debris through research, prevention, and reduction activities that aim to conserve and protect our oceans.

The Institute for a Sustainable Earth (ISE) is supported by a range of funding sources, including grants from the National Science Foundation, the U.S. Department of Agriculture, and other government agencies.

The ISE is also a member of the SDSN USA, a network of universities dedicated to promoting sustainability and resilience.

If you would like to subscribe to the ISE newsletter or learn more about the Institute for a Sustainable Earth (ISE), please visit our website at https://www.gmu.edu/sustainableearth.
