The Institute for a Sustainable Earth (ISE) is an interdisciplinary organization that facilitates information sharing among researchers, practitioners, and relevant local, national, and international organizations. The main objective of ISE is to address critical knowledge gaps and promote research that applies scientific and engineering principles to facilitate sustainable development.

The Symposium will convene key stakeholders to explore the skills, knowledge, and attitudes necessary to protect soil biodiversity and increase its sustainable use and security. The main objective of the Symposium is to address critical knowledge gaps and promote research that applies scientific and engineering principles.

The Office of Science of the US Department of Energy (DOE) is soliciting proposals for FY 2020 Financial Assistance Program (FAP) and FY 2020 Solicitation for the Office of Science Office of Scientific and Technical Information (OSTI). The DOE aims to support potentially transformative fundamental research that applies scientific and engineering principles to facilitate sustainable development.

Through a Dear Colleague Letter: Supporting Transition of Fellows, the Global Sustainability Scholars Program (GSSP) is offering research positions for fellows. The program is organized by George Mason University and is supported by the National Science Foundation (NSF). The GSSP aims to connect members of the Mason community with opportunities to engage in interdisciplinary research and develop expertise in sustainable development.

The National Oceanic & Atmospheric Administration (NOAA) Marine Debris Program (MDP) is seeking proposals for projects that aim to reduce marine debris. The program supports potentially transformative fundamental research that applies scientific and engineering principles to facilitate sustainable development.

The NSF is seeking proposals for the Global Sustainability Scholars Program (GSSP) Dear Colleague Letter: Supporting Transition of Fellows. The program is organized by George Mason University and is supported by the NSF. The GSSP aims to connect members of the Mason community with opportunities to engage in interdisciplinary research and develop expertise in sustainable development.
