Duncan Canyon Overpass

ANP Lighting's Bella Vista series was chosen to illuminate the six lane Duncan Canyon overpass on the 15 freeway in Southern California!

Bella Vista is an economical, high performance, decorative solution for roadway projects. The 117-watt, 4000K, Type 3 distribution LED source provides required foot-candle levels and superior uniformity. The spacing between poles is 90 feet.

HID VS. LED

The even illumination of the overpass by ANP's high performance LED shows a sharp contrast to the roadway area leading up to the overpass.

Drone Video

The drone video footage gives you an aerial view of the roadway surface as the lighting goes from HID to LED and back to HID. You will also see a view as if you were driving across the overpass.
