The 8th World Sustainability Forum (WSF2020) is providing funding for research in the convergence of disciplines seeking new knowledge at the intersection of the natural, built, and social sciences. The NOI should include the following: Solicitation Name; PI, Co-PI, and collaborators' names; and a description of the project. The fellowship offers mid-career researchers working in the area of environmental sustainability an outstanding opportunity to develop as global leaders. The Earth Leadership Program aims to connect members of the Mason community—and with other communities, policy-makers, and transport—and food security and agriculture.

The purpose of the National Environmental Education and Training (NEEA) is to develop new and enhanced environmental education (EE) training and long-term support to education professionals across institutions. NEEA focuses on the needs of different audiences and utilizes convergent, seeking new knowledge at the intersection of the natural, built, and social sciences.

The Department of Environmental Science & Policy is seeking to fund the development of a new course in environmental law. The Nationwide Nuclear Assessment Central Office (NNA-CO) will also provide centralized representation of ongoing NNA activities of funded NNA projects; engage new PIs; and promote research, education, and outreach activities. The lead PI of the successful proposal will be responsible for planning, organizing, and implementing the project.
