The ISE Newsletter provides up-to-date information on conferences, funding opportunities, and collaborations with others across the Mason community—and with other communities, policy-makers, and transport; and 3) food security and agriculture.

The 8th World Sustainability Forum (WSF2020) is a biennial conference that offers a platform for discussing critical sustainability issues and exploring innovative solutions. The conference focuses on topics such as sustainable development, environmental protection, and social responsibility.

Data for Nutrition (DfN) is an initiative that aims to improve nutrition security and well-being by providing data and information to decision-makers. It is a global collaboration that involves governments, civil society, and the private sector.

Maternal, Newborn and Child Health and Nutrition in the Time of COVID-19 is a conference that focuses on the impact of the pandemic on health and nutrition. It discusses strategies and solutions to ensure that even in times of crisis, essential services for women and children are maintained.

The Office of Science of the US Department of Energy invests in research that addresses some of the most pressing challenges facing society today. The Office of Nuclear Neutrino and Accelerator (NNA) program is one such initiative that seeks to advance our understanding of the role of nuclear neutrinos in the universe and develop innovative technologies.

The NNA-CO proposal will serve as the Office Director and will work with the research community to develop a strategic plan for the NNA program. The NNA-CO will also provide centralized representation of ongoing NNA research.

CIVIC is a grants program that funds projects that can produce significant community impact within 12 months (following a four-month planning phase). It is designed to support innovative projects that have the potential to help reverse global warming.

NextGen Grant is a program that aims to support projects that have the potential to help reverse global warming. The Committee will give strong consideration to proposals that aim to develop and implement innovative solutions to address climate change.

The MIC Research Committee is co-chaired by Dr. Aurali Dade, Associate Vice President for Internationalization, and Dr. Amineh Aminzadeh, Associate Vice President for Research. The committee is responsible for developing a strategic plan for the Mason's research efforts.
