USA Gypsum Launches New Website

USA Gypsum is one of the largest gypsum drywall recyclers in the United States. Announcing the launch of its new website, research director John Schumacher said, “The new site is the result of a lot of hard work and dedication to making it easy for visitors to learn about us and our mission.”

From the home page, site visitors can see separable sections of the site dedicated to Who We Are, What We Do, for Recyclers, for Distributors, Press Releases, and Partnerships. On the drywall recycling page, visitors can learn more about USA Gypsum’s services, our ISO certification, and the benefits of using drywall recycling and incineration services. Recycling is a great option for recyclers and businesses alike.

Customers will find detailed information on recommended gypsum products and recycling instructions on the USA Gypsum Website. USA Gypsum collaborates with CDRA and other organizations to ensure that USA Gypsum products are safe and meet all federal and state regulations and standards.

Founded in 1998, USA Gypsum provides economical solutions for disposing of gypsum products. At its three recycling facilities in Illinois, Indiana, and Ohio, USA Gypsum diverts several hundred tons of drywall and large quantities of gypsum products. During the past 11 years, USA Gypsum has collected over 50,000 tons of drywall and recently was selected to operate a new facility in Las Vegas, Nevada. USA Gypsum has a unique business model that allows recycling, distribution, and transportation of recycling products. USA Gypsum products are shipped across the United States and Canada.

CDRA World 2017: For Your ConExpo-Con/Agg Badge

Registering a USA Gypsum CDRA badge grants you access to a valuable source of information on the industry. But in 2017, it will be so much more. In addition to networking with like-minded professionals at CDRA Annual Meeting, you’ll also register for the ConExpo-Con/Agg badge. This is a free-for-all opportunity to network with other CDRA members.

CDRA Recycling Facility Safety Manual Available

The Construction & Demolition Recycling Association has published the first ever safety information manual for C&D; recyclers. The CDRA Recycling Facility Safety Manual is an essential resource for recycling operations. The manual, which is available online at www.cdra.org, is a comprehensive guide to safety that includes information on emergency preparedness, safety training, and operational criteria.

Demolition Convention Set For January 2017

Demolition 2017, the 15th Annual Meeting of the National Demolition Association, takes place in Las Vegas this January. The CDRA Recycling Facility Safety Manual is a valuable resource for C&D; recyclers who are preparing for the convention. The manual, which includes information on emergency preparedness, safety training, and operational criteria, is available online at www.cdra.org.
