C&DRA: Biomass is a Renewable, Sustainable Energy Source

With a new administration coming into Washington D.C. there is much uncertainty over what will be the renewable energy agenda of the Department of Energy and the Environmental Protection Agency. While it is unclear what the new administration will do, the C&D biomass industry should be prepared to discuss our renewable energy options and continue to make the case for the benefits of C&D biomass.

The C&D biomass industry should be a part of any discussion on renewable clean energy initiatives. Biomass, including C&D wood, has the potential to play a critical role in the nation’s energy mix. Biomass is an energy source that can help reduce our dependence on imported oil, increase energy security, and provide economic opportunities. Biomass has the potential to play a critical role in our nation’s energy mix.

C&D biomass creates jobs, provides income, and improves the quality of life for individuals and communities where it is produced and used. C&D biomass is an environmental and economic asset to the communities where it is located.
