USA Gypsum Launches New Website

USA Gypsum, a leader in the manufacturing of the largest gypsum drywall recycled in the United States, announces the launch of its new website, research.usagypsum.com.

From the home page, site visitors can select two separate sides of the site dedicated to USA Gypsum; USA Gypsum Products, which provides detailed information on the company’s products; and Gypsum Drywall Recycling, which features information on USA Gypsum’s involvement in the drywall recycling industry.

The gypsum product pages feature an extensive library of research documents and application tips. Gypsum continues to gain popularity as research and experience confirm its use as a building material that is not only good for the environment but also healthy for humans.

Customers will find detailed information on recommended gypsum products and will be able to download the USA Gypsum Product Catalog, which is packed with useful tips and tricks. With USA Gypsum’s environmental commitment and its focus on customer satisfaction, the company’s new website is a win-win.

Founded in 1996, USA Gypsum provides economical solutions for disposing of drywall waste, including distribution and custom fabrication. During the past 15 years, USA Gypsum has donated over 330,000 tons of clean wood and drywall recycling infrastructure. USA Gypsum is based in Las Vegas, Nevada, and services customers with a distribution network that spans the United States. USA Gypsum also has a recycling program for gypsum products and the United States.

C&D Recycling Facility Safety Manual Available

The Construction & Demolition Recycling Association (CDRA) has prepared the first ever C&D; Recycling Facility Safety Manual. The manual, which is available for free to all CDRA members, includes safety information for their employees. It is available for free to all CDRA members, providing CDRA members with a valuable resource.

The CDRA meeting is a half-day program that focuses on the issues that affect C&D; recyclers need to support any policy that considers C&D; biomass as a legible fuel and not just the burning of waste to create energy. Already, the U.S. EPA recognizes the C&D; biomass as a legible fuel and not just the burning of waste to create energy. The Agency has determined C&D; wood is not discarded when: it is combustible, has a moisture content of 20% or less, and is in a combustible form.

Customers will find detailed information on recommended gypsum products and will be able to download the USA Gypsum Product Catalog, which is packed with useful tips and tricks. With USA Gypsum’s environmental commitment and its focus on customer satisfaction, the company’s new website is a win-win.
