**CDRA Membership Remains A Great Value**

CDRA members continue to benefit from the CDRA’s high level of involvement with the national and state DOTs, construction and demolition recyclers, and the building and design community. CDRA’s expertise in the C&D recycling industry is unparalleled in the United States, and the CDRA is the only association for the C&D recycling industry.

**C&D Recycling Facility Safety Manual Available**

The Construction & Demolition Recycling Association has prepared the first C&D recycling facility safety manual. The C&D Recycling Facility Safety Manual is designed to provide C&D recycling facility owners and managers with the tools to develop a safety program that meets their needs and complies with all federal and state regulations. For more information on the C&D Recycling Facility Safety Manual, please visit www.cdrecycling.org/cdra-events.

**C&D Recycling Certification Opportunities**

The Construction & Demolition Recycling Association has developed a series of recycling certification programs to recognize the achievement of high standards in the C&D recycling industry. These programs include the C&D Recycling Certification Program, the C&D Recycling Accreditation Program, and the C&D Recycling Certification Program for Recyclers in Training. For more information on the C&D Recycling Certification Programs, please visit www.cdrecycling.org/cdra-events.

**CDRA World 2017**

Register For Your Roundtable-Conference-Badge Bundle...

CDRA World, the Annual Meeting of the CDRA, is the meeting place for the C&D recycling industry. For the past 24 years C&D World has served as the gathering place for C&D recyclers to meet and talk with each other in a non-competitive environment while hearing from expert speakers. These meetings are just part of the range of information exchange and education opportunities available to C&D recyclers through CDRA World.
