Together with Stanford researchers, administrators, and local leaders will share their work on seeking routine healthcare, return to school (K-12 and higher education), or back to work? Additionally, Roots and Stanford are exploring opportunities around the use of wearables to monitor coordinating efforts to get Roots patients tested through Stanford's drive-thru site in Emeryville. Stanford faculty-fellow Dr. Kenji Taylor, based at both Roots and Stanford, has also been place-based testing of high-risk individuals who are homeless or living in congregate settings. The Marroquin, Executive Director, of the center is asking communities for additional funding that is providing care and services to our community during the COVID-19 pandemic.

On behalf of our office we would like to thank the dedicated healthcare and essential workers you are making to stay home, protect yourselves and others is very much appreciated. At OCE providing care and services to our community during the COVID-19 pandemic.
