Academic Mentorship is a secret weapon in achieving career success. According to the Association for Psychological Science, "Mentorship is a critical component of success in academia; for students at all stages, for staff looking to advance their careers, and for tenured faculty, while performing research, and also to hone leadership skills. Our Mason Science community offers countless mentorship opportunities for all who seek to grow."

More on the celebration of Mason’s 50th anniversary, which includes a 50th Anniversary Dedication and Vision Day, on April 7, 2022. As you may know, she emerged from the deep south to earning his PhD in Physics from Stanford University to later working at elite organizations including MIT. In June, Hakeem Oluseyi, Astrophysicist, Visiting Robinson Professor, released A Quantum Life: My Unlikely Journey from the Street to the Stars.

In The News

A unique path to a career in physics. Hakeem Oluseyi, Astrophysicist, Visiting Robinson Professor, released A Quantum Life: My Unlikely Journey from the Street to the Stars. By Oluseyi and Joshua Horwitz, the book follows Oluseyi’s journey from his childhood in the deep south to earning his PhD in Physics from Stanford University to later working at elite organizations including MIT.
