New York Times article in The Hill

SOCIOLGY

Amaka Okechukwu, a sociology professor here at Mason who specializes in race, ethnicity and social movement said, “While he was convicted of murder and held legally accountable … the same day, Ma’Khia Bryant, [a 16-year-old Black] teenager in Ohio, is killed by the police.” Okechukwu added, “I use that as just an illustration of the persistent and systemic nature of this violence. It is beyond individual officers. At this point, this is a systemic issue.”

But, she said, “I also recognize that as an American citizen, I don’t have the authority to call out the President, or the police, or any systemic issues.”

Mason’s Center for Applied Proteomics and Molecular Medicine (CAPMM) that includes Mason researchers and respiratory syncytial virus. The base technology underlying the Nanotrap® particle was created by scientists at Ceres Nanosciences, an advanced particle manufacturing plant in Manassas. This technology has been licensed to Ceres Nanosciences, a Mason start-up.

IN THE NEWS

Sad news for Masoners looking forward to a graduation ceremony. The university still needs volunteers to help at the Patriot Procession on May 12. If you’d like to volunteer, please click here.
