The ISE Newsletter provides up-to-date information on conferences, funding opportunities, and pressing sustainability and resilience challenges.

The 8th World Sustainability Forum is an international scientific conference that brings together experts from various fields to address sustainability challenges. This year, the theme of the forum includes: 1) health and medicine; 2) mobility; and 3) food security and agriculture.

The forum is being held virtually on June 1, 2020, due to the COVID-19 pandemic. The theme for the meeting includes: 1) health and medicine; 2) mobility; and 3) food security and agriculture.

The Office of Science of the US Department of Energy is providing funding for research in the following program areas: Advanced Scientific Computing Research, Basic Energy Sciences, Biological and Environmental Research, Fusion Energy Sciences, High Energy Physics, and Nuclear Physics.

The Coastlines and People program is a multi-disciplinary initiative that aims to transform understanding of coastal environments. The program is structured using a convergent science approach, at the nexus between coastal science, human dimensions, and coastal processes.
