The 8th World Sustainability Forum (WSF2020), jointly organized by the United Nations Sustainable Development Solutions Network (UN SDSN) and the City of Geneva and the UN Sustainable Development Solutions Network (UN SDSN). In light of the COVID-19 pandemic, we have reimagined how we can move forward as a planet.

As we navigate through challenging times, we stand united behind humanity. As we move towards a collective vision of recovery and justice, we want to build a new foundation for a sustainable future.

In this context, the United Nations Sustainable Development Solutions Network (UN SDSN) together with the City of Geneva and the Global Innovation Fund (GIF) have organized the 8th World Sustainability Forum (WSF2020).

The purpose of WSF2020 is to bring together experts, leaders, and innovators from diverse fields to discuss solutions and strategies for achieving the Sustainable Development Goals (SDGs).

The forum will cover three key areas:

1) The global climate crisis, focusing on how to address the emergency and transition to a sustainable future
2) Social and economic justice, with a focus on equitable recovery and resilience
3) Food security and agriculture, exploring how to ensure sustainable and equitable food systems

These themes will be discussed in the context of the SDGs, and the aim is to foster a collective understanding of the challenges and opportunities.

In the spirit of the WSF2020, we are encouraged to think beyond traditional boundaries and consider new solutions that can help us move towards a sustainable future.

The forum will be virtual, and registrants will have the opportunity to engage with the speakers, ask questions, and participate in discussions.

We hope you will join us for this important event and contribute to the dialogue on sustainable development.
