A semiannual newsletter aims to share the latest news in sustainability, resilience, and environmental science. The newsletter features contributions from leading experts, showcasing research on critical topics such as human dimensions and coastal processes.

The newsletter highlights a collaborative effort involving the University of Basel, the University of Qatar Foundation, the Office of Science of the US Department of Energy, and the National Geographic Society. The partnership is focused on promoting sustainability and resilience through a campaign for environmental protection, initially launched in 1974.

Moreover, the newsletter mentions an initiative led by MDPI, which is coordinated under the patronage of the University of Basel. This initiative seeks to invest in social innovations that aim to improve the lives of people in coastal areas and beyond.

The newsletter also covers a recent webinar event co-hosted by the Volgenau School of Engineering, featuring prominent experts such as Professor Robert Axtell and Dr. Ed Maibach. The webinar aimed to discuss the quantitative model of credit risk in the context of COVID-19 outbreaks.

Additionally, the newsletter provides information on funding opportunities, including the Office of Science Solicitation for FY 2020 and the Office of the US Department of the Navy. It also mentions the AI for Earth Innovation Fund, which supports projects with the potential for lasting impact.

The newsletter concludes by inviting readers to subscribe to their email list to stay updated on future issues.
