The Global Innovation Fund seeks to invest in social innovations that aim to improve the lives of people in the developing world, including those living in extreme poverty. The Innovation Fund is seeking to support projects that target key challenges such as health, education, and economic opportunities.

The goal is to create a more sustainable and inclusive world by supporting initiatives that promote social innovation and entrepreneurship.

The fund will provide up to $50,000 in funding for four months to undertake development activities, with a budget of up to $50,000 available. If you would like to add opportunities to the database please contact the Research Development Services.

---

The Civic Innovation Challenge is available. If you haven't yet submitted your research profile is a tool for you to find others with complementing expertise and for broadening participation goals. The objective of this solicitation is to support Coastal Research Hubs, structured using a convergent science approach, at the nexus between coastal human-built, and social systems in coastal, populated areas.

The Office of Science of the US Department of Energy is providing funding for research in the area of Nuclear Physics. The funding source is the Office of Science of the US Department of Energy.
