and international organization.

The Institute for a Sustainable Earth (ISE) research pertaining to environmental science and sustainability. The biweekly newsletter aims to provide updates on research, events, and initiatives related to sustainability. In light of the COVID-19 pandemic, the theme for the meeting includes: 1) health and medicine; 2) mobility and transportation; 3) economic recovery and resilience; 4) environmental sustainability; 5) education and workforce development.

The 8th World Sustainability Forum, organized by MDPI under the patronage of the University of Basel, the University of California, and the University of New South Wales, is a virtual conference that aims to bring together experts from around the world to discuss and exchange ideas on sustainability issues.

Planet! is a global online broadcast to mark World Environment Day, held annually since 1974. The event encourages actions that promote environmental protection and sustainability. The event will feature a range of speakers and panels discussing the importance of protecting our planet.

Global Innovation Fund is providing funding for research in the fields of Biological and Environmental Research, Fusion Energy Sciences, High Energy Physics, and Geosciences. Proposals are accepted at anytime.

AI for Earth Innovation is a program that seeks to support projects that can produce significant community impact within 12 months. Up to 12 awards per track will be made for Planning Grants – each with a budget of up to $1,000,000 for up to 12 months.

CIVIC is a program that seeks to support projects that can produce significant community impact within 12 months. Up to 12 awards per track will be made for Planning Grants – each with a budget of up to $1,000,000 for up to 12 months.

Connected Communities (S&CC) domain is designed to build a more cohesive research-to-action pipeline and foster a collaborative spirit. CIVIC will fund projects that can produce significant community impact within 12 months (following a four-month planning phase) – in any sector as long as they can demonstrate their innovation improves the lives of those living in those communities.

The 4th ISE Webinar is held today, June 4, 2020, from 3-4:30pm. The webinar will feature a panel discussion on environmental sustainability and will be available virtually. Please sign up here.

The ISE faculty profiles are available here. Dr. Ed Maibach has been honored with the 2020 Presidential Awards for Faculty Excellence. He is an expert in change communication and has been a faculty member and Director of the Institute for a Sustainable Earth.
