The Venture Design Challenge showed me how to put my ideas on paper and explain my thoughts thoroughly. I feel a lot more confident in myself and my ability to pitch an idea. After the pitches wrapped, we celebrated our winners and honored our graduating ENTP students. I am proud of our ENTP students. I know they will do great things in the world!

What I loved about the pitch competition and ENTP classes in Innovation was the ability to pitch an idea. However, the ENTP program at Lake Forest College allowed me to identify problems worth solving and how to mobilize the people, resources, and networks to solve them. Our students' great ideas start at the Great Lakes Institute at Northwestern University and go anywhere and everywhere. Companies from all across the country join YC for its investor network, and many more. Located in the San Francisco Bay Area, YC truly pioneered the accelerator model.
