**Default Day is Almost Here!**

A UCPath Alert was announced on January 25, 2022 with all of the Default Day details. Your support and assistance are an essential component to achieving the goal of reducing our default project balances and reducing unnecessary cost transfers. The first Default Day will be February 11. Default Day, which will occur every second Friday of the month, will be focused on identifying any issues that may result in UCPath expenses posting to your department’s FinU default project.

On each Default Day, the Payroll team will send an email communication with a Funding Issues Report attachment or link with specific steps on how to make any necessary adjustments to projects or UCPath funding entries to prevent future payroll from posting to the FinU default project. When you receive the report, it will be extremely important to review and correct the funding entries before the UCPath deadlines.

Creating a Requisition from a Multi-Line Quote
The newest Oracle Procurement KBA focuses on how to most efficiently create a requisition from a multi-line quote to reduce time spent compiling the requisition as well as payment delays due to invoice holds. A full list of punchout suppliers offering quote retrieval is provided in the KBA, and instructions are provided for those quotes which need to be populated via request form instead of retrieved via punchout.
