For every child who tenderly pressed a flower or a four-leaf clover inside a beloved book, there is a treasure awaiting in the enhanced Clemson Herbarium.

Students are moving into residence halls this week! Although the semester has already kicked off virtually, starting Sept. 21 we welcome our freshmen and returning students back to campus for some in-person learning. You might be wondering what it looks like around here. We've gotten creative! Fike gym has been converted to a large classroom where several courses will off virtually, starting Sept. 21 we welcome our freshmen and returning students back to campus – just 6 feet apart.

Home to more than 12,000 students, the Clemson Family is united as Tigers. We are focused on a Healthy Clemson – United as Tigers.

As we welcome home our Clemson Family, I encourage you to stay engaged with us by learning science, asking questions, and giving, because your gift matters. In the past year, and we are well on our way to making this happen. With special thanks to the Yoder Family General Scholarship Endowment, we are grateful for your support during this time and always. Many of you have reached out with messages, questions and gifts as we've navigated the past few months. To further support our messages, questions and gifts as we've navigated the past few months. To further support our teachers and students now and for generations to come, I am happy to announce a new Faculty Excellence

The Clemson University Science Outreach Center is dedicated to inspiring and empowering the scientist within each of us. See below for new ways to bring scientific inquiry, engagement and community service to the Clemson community and across the nation.

The mission of the Clemson University Science Outreach Center is to inspire and empower the scientist within each of us. See below for new ways to bring scientific inquiry, engagement and community service to the Clemson community and across the nation.

As we celebrate the many ways in which science is changing our world, we also cannot forget the researchers and scientists who still are working in new and innovative ways to stop the spread of COVID-19. We would like to acknowledge two researchers, Dr. Feng Ding and Dr. Vincent Richards, who have been instrumental in moving our nation and our world back to normal.

Dixie Damrel has been curator of the Clemson Herbarium for the past 35 years. There is a treasure awaiting in the enhanced Clemson Herbarium.
