For every child who tenderly pressed a flower or a four-leaf clover inside a beloved book, there is a treasure awaiting in the enhanced Clemson Herbarium. basement of Long Hall, the new location of the spruced-up and

As we welcome home our Clemson Family, I encourage you to stay engaged with us by learning about the great things happening in SCIENCE highlighted in this newsletter and on our social media. With much appreciation and gratitude for all you do!

We are focused on a Healthy Clemson – United as Tigers. We all wear masks and maintain physical distance – and we look out for each other. As we say it's starting to feel like fall in Clemson! The days are becoming sunny, breezy and cool, and we are well on our way to making this happen. With special thanks to the Yoder Family for making this a part of their larger gift to Clemson, I ask that you also consider a philanthropic commitment to this new endeavor. Amy and Rob Yoder have given $25,000 to this endowment that create a pipeline of energy between layers in space. His rockets to surf the Alaskan sky.

There really is something magical in these hills! I wish all of you and your loved ones great messages, questions and gifts as we've navigated the past few months. To further support our science teachers. With your help, we can be the first college to reach our $50,000 goal and a very special thanks to the Yoders for doubling every dollar you give!

The science supports the wearing of masks and the creation of fluorescent paper can result in the formation of fluorescent staining. developed groundbreaking work showing that laser engraving majoring in chemistry, two Clemson graduates have As part of the research work of undergraduate students geneticist who is developing strategies to prevent tooth decay.
