Funding Opportunities

DMS/NIGMS initiative to foster interdisciplinary research at the interfaces of the biomedical and physical sciences.

Call for Proposals: Integrated Approaches to Human Migration and Mobility in an Era of Rapid Global Change

This recently issued Dear Colleague Letter (DCL) discusses an initiative by the National Institutes of Health (NIH) to support research on human migration and mobility, particularly in areas of rapid global change. The initiative aims to understand how migration and mobility are affected by climate change, environmental degradation, economic instability, and other factors.

Closing Date for Applications: Sep 19, 2022

Proposals are expected to address at least two of three areas of migration and mobility research: socioeconomic factors, environmental factors, and health implications. The initiative provides up to $5 million in funding per project.

DMS/NIGMS funding opportunity is only open to the ORAU members. Led by the National Institute of General Medical Sciences (NIGMS), the initiative is designed to encourage new interdisciplinary approaches to human migration and mobility research.
