**NSF Program Call for Proposals**

**Summary**

**Core program solicitation (PAPPG).**

- **Deadline:** December 15, 2022
- **Estimated Total Program Funding:** $2,000,000

- **Desired Transdisciplinary Research Areas:**
  - **Climate**
  - **Sustainability**
  - **Design**

- **Project Duration:** 3 years

**Future Earth support** can be found in the

**Future Earth US Global Hub** is pleased to announce available funding for researchers and trainees to work on projects in transdisciplinary areas.

- **Call for Proposals:** Integrated Approaches to Human Health Research on Climate Change and Human Health.

- **Funding Goals:**
  - Enhance transdisciplinary research and collaboration.
  - Support research that addresses real-world problems.

**NOSI ES-22-010: SBIR Innovative Technologies for Patient with Foot Ulcers.**

- **First Available Due Date:** September 5, 2022
- **Expiration Date:** May 08, 2025

**NOSI NOT-ES-22-006: Notice of Special Interest: Climate Change and Human Health.**

- **Funding Goals:**
  - Focus on transdisciplinary research.
  - Support high-impact, high-risk, high-reward projects.

**Sentara Fall Grant Cycle**

- **Funding Opportunities:**
  - **Prevention of Violence:**
    - $50 million in new grant funding.
  - **COVID-19:**
    - $30 million in new grant funding.
  - **Countering the Rise in Hate Crime:**
    - $10 million in new grant funding.

**Office of University Events**

- **Public Webinars:**
  - **Tuesday, July 5, 2022:**
    - **Health and Safety During Childcare:**
    - **Fostering Resilience With an Engineering Mentoring Framework:**

**Office of the President**

- **New Initiatives:**
  - **Sustainability:**
    - **Skilled Careers Program:**
    - **Future Earth:**

  - **Call for Proposals:**
  - **Integrated Approaches to Human Health:**

**Future Earth** is an international research-education initiative that is bringing together a diverse group of researchers, practitioners, and decision-makers to address 21st-century challenges related to sustainability. Future Earth’s goal is to develop and deliver decision-relevant knowledge that can be used to inform policies and actions across a range of sectors, including climate action, land use, ocean health, and biodiversity conservation. Future Earth is committed to supporting researchers and trainees to work on projects in transdisciplinary areas.
