Disaster Recovery Planning: The Key to Business Continuity

A well-designed disaster recovery plan (DRP) is essential for organizations of all sizes. It ensures that critical business functions can continue in the event of a disaster, minimizing downtime and ensuring data integrity. In this session, you will learn the four key components of a comprehensive DRP, how to create a recovery time objective (RTO) and recovery point objective (RPO), and best practices for testing and maintaining your plan. Attendees will receive a copy of the National Incident Management System (NIMS) Core Guides series, including the NIMS Guide to Disaster Recovery Planning, which provides a detailed overview of the key concepts and strategies needed to develop and implement an effective DRP.

Tickets: $50 for University employees and students. Non-UCSD employees and students: $100.
