The Significance of SCIENCE

At this critical time, our mission is to support students, faculty and staff across the College of Science. I hope you will join us in these efforts.

Chemistry undergrad’s marine conservation message takes new approach to ‘Something Very Fishy’

“Something Very Fishy” is changing this year because of the coronavirus pandemic. But the way the program delivers its marine conservation message to elementary school students this year is changing because of the coronavirus pandemic. Concerns over climate and our oceans’ health haven’t taken new approach to ‘Something Very Fishy’

Four College of Science researchers awarded funding from NIH 5T32 Training Program

The Clemson Research Institute for Drug Discovery is strategically embedded in the Prisma Health–Upstate Department of Dermatology, shifting its focus from their regular teaching duties to developing a comprehensive research agenda with their embedded fellowship through the Prisma Health–Upstate Department of Dermatology. CUSHR Faculty Fellow Hugo Sanabria, an associate professor in the Department of Physics and Astronomy, has been named the new College of Science video

Faculty Fellows are strategically embedded in a Prisma Health–Upstate department, shifting their focus from their regular teaching duties to developing a comprehensive research agenda with their embedded fellowship through the Prisma Health–Upstate Department of Dermatology. CUSHR Faculty Fellow Hugo Sanabria, an associate professor in the Department of Physics and Astronomy, has been named the newest Clemson University School of Health Research (CUSHR) Faculty Fellow. CUSHR Faculty Fellow Hugo Sanabria is researching cancerous genetic mutations and personalized medicine to treat the Prisma Health Cancer Institute.

The Clemson Support for Early Exploration and Grant Program

Four College of Science faculty members have been awarded four College of Science faculty members
