The Significance of SCIENCE

The past year has been unlike any in our lifetimes. As a result, it’s been a year of challenges and impacts across many levels. Yet, through your engagement and support — and as ambassadors of SCIENCE, I’d like to share with you a year that is changing because of the coronavirus pandemic.

Concerns over climate and our oceans’ health haven’t taken new approach to ‘Something Very Fishy’

Grad student’s NNSA fellowship is the latest in a growing pipeline of federal support for Clemson’s work in science.

From left, Lesly Temesvari and Thao Tran

Four College of Science professors awarded funding from new CUSHD Health Grant Program

The winner of the employee award is Sharetta Bufford, assistant professor in Service Award recipient, Clemson’s Inclusion Collaborative

A dark day turned bright for a chemistry researcher thanks to a federal fellowship.
