Welcome New IPPSters

Check out the smart locker technology can be applied beyond package pickup, to expand service. Expanding services beyond the student experience is The Trove's new Mailing Center, transforming mail and parcel services with advanced technology, increased safety, and customer convenience.

The Trove project began over a year ago as part of Logistics' Consolidated Student Mail and Parcel Services initiative. The goal is to provide a more efficient and reliable service for students and faculty. The project has been a success, with positive feedback from users. The new Mailing Center is expected to further enhance the service, with additional features and improvements.

Congratulations to Integrated Procure-to-Pay Solutions (IPPS) Logistics and Housing Services. We are proud of the work we have done and look forward to continued success.

L2.0 Carbon Neutral Last Mile Initiative

The University of California has launched a new initiative to reduce its carbon footprint. The L2.0 Carbon Neutral Last Mile Initiative aims to make the University's supply chain more sustainable by reducing emissions and increasing efficiency.

This initiative is part of the University's broader sustainability goals and is supported by a range of stakeholders, including IPPS Logistics, Housing Services, and other departments. The initiative involves the implementation of a range of measures, including the use of electric vehicles, the optimization of delivery routes, and the use of sustainable materials.

The L2.0 Carbon Neutral Last Mile Initiative is expected to have a significant impact on the University's carbon footprint, with a goal of achieving carbon neutrality by 2030. We are proud to be part of this important initiative and look forward to working with our partners to achieve our goals.

A New Life for Modular Furniture

Surplus Sales, a service of IPPS Logistics, has recently expanded its offerings to include a new program for the resale of modular furniture. This program is designed to give these items a new life, rather than sending them to the landfill.

Surplus Sales has partnered with the Environmental Health and Safety (EH&S) ergonomic office team at UC San Diego Health to install a new program for the resale of modular furniture. The program allows businesses to purchase this furniture at a fraction of the cost of new items, while also helping to reduce waste.

The program has been well-received, with a number of businesses taking advantage of the opportunity to purchase this furniture. Surplus Sales is proud to be part of this program and looks forward to continuing to offer this service to our customers.

Benefits of the Small Business First Strategy

To support small businesses, the University of California has adopted the Small Business First Strategy. This strategy is designed to promote innovation and growth while supporting local businesses.

The Small Business First Strategy includes a number of measures, including the setting of a goal for small business participation in contracts and the development of a Small Business First Program. The program is designed to help small businesses to compete for contracts and to access new business opportunities.

The Small Business First Strategy is intended to have a significant impact on the University's procurement practices and to support local businesses. We are proud to be part of this important strategy and to support small businesses in our community.
