The ISE Newsletter provides up-to-date information on conferences, funding opportunities, and businesses and organizations—so that, together, we can more effectively address the world’s sustainability challenges.

The Institute for a Sustainable Earth (ISE) and Stream. The deadline for submitting an abstract for each option is 31 March 2020.

This second virtual conference will examine the implications of COVID-19 for public health and development. On 23 April, over the 24 hours of Earth Day, we will discuss successful public health interventions, how to ensure responses are inclusive and equitable, and how we can incorporate lessons learned into future planning.

This webinar will provide you with an opportunity to learn more about FACS' URAP and CIVIC award.

Globally, 80% of hospital waste and 70% of plastic in landfills is made up of medical waste. The World Health Organization estimates that over 10% of medical waste is burned, with up to 90% of the waste incinerated in developing countries. The recommended bioremediation approach to this problem is incineration. The plastic waste problem requires creative approaches from many stakeholders.

Sustainable solutions to the plastic waste problem require creative approaches from many stakeholders.

Utilizing Innovative Materials Science Approaches

On 21 April, the 50th anniversary of Earth Day, join us for an online event to hear from innovative individuals on research and policy that could advance our efforts to build an economy that is sustainable, safe, and secure. The event will feature a distinguished panel of speakers, and provide a forum for students to present their research. The deadline for submitting an abstract is 31 March 2020.

This funding opportunity focuses on research that will advance mechanistic understanding of the relationship between the environment and public health outcomes. The deadline for submitting an application is 23 May 2020.
