The ISE Newsletter provides up-to-date information on conferences, funding opportunities, and works, resources to support you/your team, and more information about how you can get involved!

This second virtual conference will examine the implications of COVID-19 for public health and returning to normal. You will find activities that happened over the world.

Earth Day Week Conference
Together with Earth Day Network and Exponential Roadmap, We Don't Have Time presents the Earth Optimism Summit 2020. To celebrate the 50th Anniversary of Earth Day on April 22nd, 2020, the purpose of the...lead to meaningful funded research on COVID-19 response and resilience. The Center for Resilient and Sustainable Communities will hold a Pandemic Response and Resilience Workshop. The objective of the workshop is to foster research collaborations that will advance mechanistic studies.

Earth Optimism Summit 2020
If you plan to submit an internal application for one of the opportunities, please submit a Notice of Intent to the PSC Landscape CSI: Fellowship Cynthia Smith. For more information, please visit the...thought leadership, and education and training, the U.S. in the development and delivery of environmental education and training programs and studies.

NextGen Grant
The purpose of the...lead to meaningful funded research on COVID-19 response and resilience. The Center for Resilient and Sustainable Communities will hold a Pandemic Response and Resilience Workshop. The objective of the workshop is to foster research collaborations that will advance mechanistic studies.

The Globa Innovation Fund
ensure our ability to track their fate in the environment.

The Enduring Impacts: Archaeology of Sustainability
focuses on the gathering and analysis of...orations on the diversity, evolution, and history of life on earth since the last major extinction event.

AI for Earth Innovation
will showcase stories of both small and large-scale actions that frame the conversation and demonstrate that success is possible in conservation, climate, and sustainability.

The Civic Innovation Challenge
focuses on research that will advance mechanistic...information of this approach was published in Nature in 2018 and is available online.

Synthetic Biology in the Environment
enhance the long-term viability of bio-based production, and improve the information and communication technologies used to support those goals.

The National Institute of Environmental Health Sciences (NIEHS)
including solidifying the team, maturing the project plans, and preparing to submit a well...future emissions of greenhouse gases in the atmosphere. Will primarily judge proposals on the...funding opportunity focuses on research that will advance mechanistic studies.

The National Institute of Environmental Health Sciences (NIEHS) - Special Research Grants Program - Aquaculture
enhance the long-term viability of bio-based production, and improve the information and communication technologies used to support those goals.
