ANP Lighting

Albuquerque Decorative Street Lighting Retrofit

On November 21st, 2017, Mayor Richard Berry celebrated the activation of a 15-year contract to convert over 20,000 streetlights in to LED in Albuquerque. Following mayor Berry's initiative, the City of Albuquerque and Citelum have collaborated to create "EnvisionABQ", a unique plan to relight Albuquerque.

ANP Lighting was chosen for this project based upon performance, visual comfort, best energy savings, lead time, warranty and price.

ANP provided retrofit kits for the decorative lighting portion of the project. Each pole consisted of a 250-watt MH luminaire for street lighting and a 150-watt MH pedestrian luminaire.

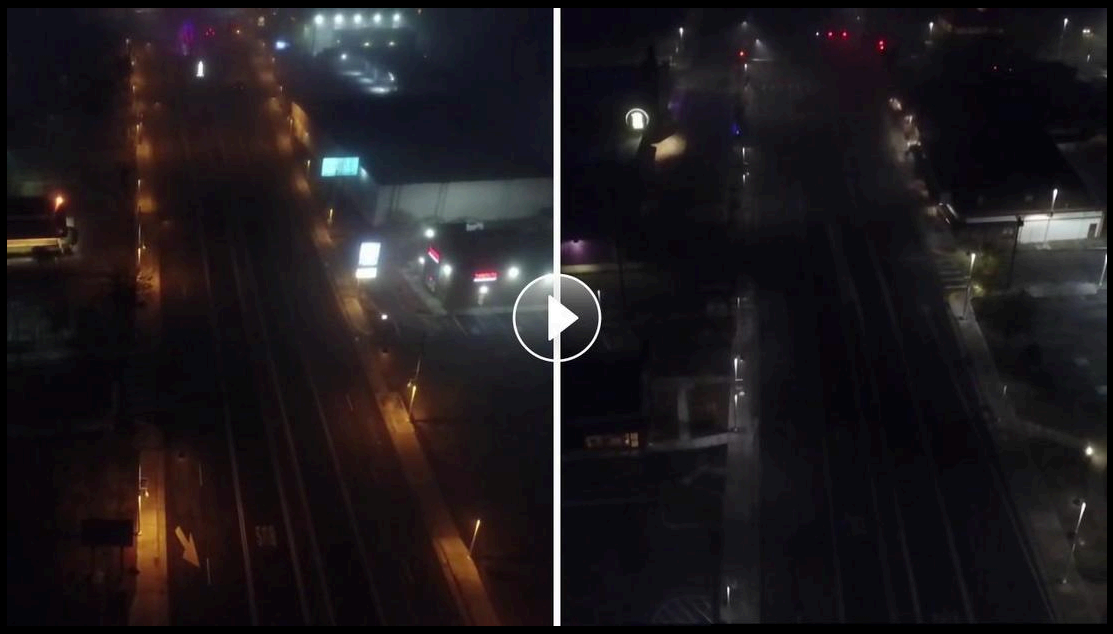

The existing HID components of the fixtures were replaced with 78-watt LED retrofit kits for the street lighting and 29-watt LED retrofit kits for the pedestrian luminaires.

Before Retrofit (150-watt MH, 250-watt MH)

After Retrofit (29-watt LED, 78-watt LED)
