Marked Increase in Congenital Syphilis in Tennessee

Tennessee Department of Health (TDH) reports a 227% increase in congenital syphilis cases, compared to a 185% increase nationally. Over 60% of preventable congenital syphilis infections in Tennessee were among women with no or late prenatal care. TDH is asking for your help to prevent congenital syphilis.

TIPQC PAS Presentation

Dr. Scott Guthrie presented the Optimal Cord Clamping Project at PAS 2023. Lots of interest in this TIPQC Project and how over 70% of all babies born in TN now get delayed cord clamping.
