Dear Members of the UO Research Community,

Rachel Cleveland was the only AAS CASE workshop attendee from Oregon during a recent ceremony that included the induction of more than 40 UO patent holders. The Office of the Vice President for Research and Innovation (OVPRI) is working with the University of Oregon's Undergraduate Student Advocates for Research Funding (USAFR) to find new ways to support student advocacy. The USAFR has been working on policy and legislative changes to help increase student funding for research, and the Office of the Vice President for Research and Innovation is happy to support their efforts.

Rachel Cleveland is a senior at the University of Oregon and was the only student from Oregon to attend the American Association for the Advancement of Science (AAAS) CASE workshop. She presented her research on the effects of environmental stress on fish survival and was selected as one of the top 10 presenters at the workshop.

The Office of the Vice President for Research and Innovation is proud to support Rachel Cleveland and her work. We are committed to providing funding opportunities and resources to UO students who wish to pursue research.

Dear Members of the UO Research Community,

Rachel Cleveland was the only AAS CASE workshop attendee from Oregon during a recent ceremony that included the induction of more than 40 UO patent holders.
