The eighth annual Undergraduate Research Symposium Bigger Than Ever Operandi

UROP has recently interviewed two undergraduate researchers as part of their regular series A Closer Look at Undergraduate Researchers

UROP Funding Opportunities

Carrie Chesbro is the new Associate Director of Post Award. She has been serving as the Interim AD since February 2018. She will be overseeing all post-awards functions and will serve as the lead on audits and internal controls.

Jon Loftus has been promoted to the newly developed Post-Award Manager position. Jon will be responsible for the day-to-day transactional work and management of the post-award teams.

The University of Oregon celebrated the launch of the first national Academy of Inventors (NAI) chapter at the University of Oregon — the state’s only Association of American Universities member. Research, administrative and financial support for sponsored programs, including identification of funding opportunities to meet their goals, is fundamental to the mission of the University and is essential to Oregon’s economy.

Dear Members of the UO Research Community,

The University of Oregon’s Office of the Vice President for Research and Innovation (OVPRI) shares stories of undergraduate researchers across campus. We aim to share the stories of students and faculty who work to solve a wide range of important problems. These stories can inspire others to find solutions to the challenges they face in their own work.

One of the main talking points when I went to talk with my representatives was to give examples as to why I’ve benefited and why other students will benefit from how they choose to fund science policy.

“It’s important for the university to have money to give to students to do their research,” Cleveland said. “It’s not just about the academic and intellectual growth that happens, but also the opportunities that are made available to students to do their work.”

“Community Relations

Community Relations

The University of Oregon formally joined NAI last year. NAI is a member organization with strong representation from national research universities. The University of Oregon was one of the inaugural members of NAI.

“McKelvey created an opportunity for me to attend a conference,” Cleveland said. “It was a great experience. It was my first time being able to speak in front of a group of people, and it was a very interesting experience. I was able to present my research and interact with other researchers from around the country.”
