Dear Members of the UO Research Community,

I hope you will join me in congratulating our own Judith Eisen on her recent election into the American Academy of Arts and Sciences. Dr. Eisen is a professor in the Department of Molecular and Cellular Biology and a world-renowned scientist in the field of animal neural crest development. Additionally, she's been a strong proponent of science outreach and an amazing mentor to our students — not to mention one of the kindest people you will ever meet. I am proud to call her my colleague and friend.

As the Vice President for Research and Innovation, my top priority is supporting researchers across the university. In 2018, faculty and staff at the University of Oregon received 25 new awards totaling more than $2.8 million in support of research activities. During the month of April 2018, faculty and staff at the University of Oregon received 25 new awards totaling more than $2.8 million in support of research activities. During the month of April 2018, faculty and staff at the University of Oregon received 25 new awards totaling more than $2.8 million in support of research activities.
