The eighth annual Undergraduate Research Symposium Bigger Than Ever

UROP has recently interviewed two undergraduate researchers as part of their regular series A Closer Look at Undergraduate Researchers.

Carrie Chesbro is the new Associate Director of Post Award. She has been serving as the Interim AD since February 2018. She will be overseeing all post-awards functions and will serve as the lead on audits and internal controls.

Jon Loftus has been promoted to the newly developed Post-Award Manager position. Jon will be responsible for the day-to-day transactional work and management of the post-award teams.

Letters from the Vice President

Parting Shot

The University of Oregon celebrated the launch of the first national Research Mentoring Network (NMN) mentoring program in Oregon. Led by the Office of the Vice President for Innovation (OVPRI), the NMN mentoring program is designed to attract and retain students in STEM fields.

Leila Ashkenazi

Leila Ashkenazi is a UO environmental science student. She presented a poster on her research titled "Understanding the Impact of Aquaculture on Marine Biodiversity." Her research focuses on the effects of salmon aquaculture on the surrounding ecosystem.

"One of the main talking points when I went to talk with my representatives was to give examples as to why funding for student researchers is critical," Ashkenazi said. "It's important for the university to have money to give to students to do their research," Cleveland said.

"It's important for the university to have money to give to students to do their research," Cleveland said. "It's important for the university to have money to give to students to do their research," Cleveland said.

The future trainings, send an email to rds@uoregon.edu in order to encourage students from underrepresented groups to remain in STEM fields. For information on RDS will host a workshop on May 24-25 training graduate students and postdocs who will mentor a SPUR student this summer. The workshop will discuss strategies for creating an inclusive and supportive research environment for students.

Undergraduate biology student Natalie Mosqueda uses blue dye to stain the bones of developing embryos of the Bullhead Notothen fish, which is a type of fish native to the Antarctic. Mosqueda's research focuses on the role of neural crest development in the evolution of the Bullhead Notothen fish.

"I hope you will join me in congratulating our own Judith Eisen on her recent election into the American Academy of Arts and Sciences. Her remarkable accomplishments include pioneering research seeking to understand the molecular basis of development in the nervous system," Eisen said.
