Black History Month Spotlight: Octavia E. Butler

This Black History Month, we'll be highlighting some historical Black figures who have played a significant role in shaping and influencing our country. Octavia E. Butler (1947-2006) was a science fiction writer who revolutionized the industry by including Black protagonists and women's rights in science fiction.

Butler's 1979 novel, *Kindred*, jumpstarted her career by featuring a story about slavery and race relations through a sci-fi lens. Other notable Butler works such as *Xenogenesis*, *Parable of the Sower*, and *Fledgling* explore topics like gender identity, sexuality, and environmentalism. Octavia E. Butler's trailblazing work has helped to redefine the genre, setting a new precedent for who can both write and enjoy science fiction.
