the Center’s mission: to harness data science to address health disparities.

As I reflect on 2022, the word “growth” comes to mind. Our network of community engaged scholars at Stanford
Medicine has been growing leaps and bounds! We at OCE welcomed Cristina Mancera to our team in October (read
more about her and her role in this newsletter!), but other community-focused teams at Stanford Medicine have also

Throughout the day, Jones illuminated for her audience four key messages: Racism Exists, Racism is a System,
leaders from Community Service Centers, Jones shared her professional path, her career journey in medicine and

facilitating community-driven inquiry and solutions. Cristina is very excited to join OCE, and is looking forward to
community in North Bay and has eagerly returned to research with a renewed and strengthened passion for

journey of improving health equity with you.
