Sharder quote of "Hope" helps us stay the course

"Your choices reflect your hopes, not your fears."—Nelson Mandela

Message from the Dean

At the beginning of this semester, we selected a few meaningful quotes to help guide us through these unprecedented times. These sentiments appear on our t-shirts, stickers, and social media channels as a means of support. Of inspiration. Of hope. Of truth.

By Dean Fernando R. Miralles-Wilhelm

The Mason Science Series — Modern Scientific Approaches for Studying the Time Since Death

Friday, October 23, 2020

The Mason Science Series is in full swing. Dean Fernando Miralles-Wilhelm will host the next virtual discussion, featuring guest speakers on artificial intelligence, thermoelectric materials, and antimicrobial peptides, respectively.

School of Systems Biology's Xiaoyan Tan, Professor, Bioinformatics and Computational Biology, is among the speakers. For the Mason Science Series — Modern Scientific Approaches for Studying the Time Since Death, Tan will be discussing her research on a computational approach for estimating the time since death at the scene of the crime.

At the Scene of the Crime: The Scientific Approaches for Studying the Time Since Death

Friday, October 23, 2020

This year's Mason Science Series is in full swing. Dean Fernando Miralles-Wilhelm will host the next virtual discussion, featuring guest speakers on artificial intelligence, thermoelectric materials, and antimicrobial peptides, respectively.

School of Systems Biology's Xiaoyan Tan, Professor, Bioinformatics and Computational Biology, is among the speakers. For the Mason Science Series — Modern Scientific Approaches for Studying the Time Since Death, Tan will be discussing her research on a computational approach for estimating the time since death at the scene of the crime.
