Thank you all for a great year.

Mason physicist part of research change featuring interviews with
Mason's COVID-19 surveillance testing site will be open for two Mondays during winter break, on December 20 and December 27 from 9 a.m. to noon in Fenwick Library on the Fairfax Campus.

Mason's vaccine site will be closed for two weeks during winter break (December 20 – 31). The Mason vaccine site will resume regular hours on Monday, January 3.

Mason is committed to providing a safe and healthy environment for students, faculty, staff, and visitors. It is important to all of us to take measures to prevent the spread of COVID-19 and protect our community.

In an effort to maintain a safe and healthy campus, Mason has implemented several measures to prevent the spread of COVID-19, including:

- Mask requirements in all campus buildings
- Social distancing
- Increased cleaning and sanitizing

Mason is also offering the COVID-19 vaccine to the Mason community. It is important to all of us to take advantage of this opportunity to protect ourselves and our community.

In addition to the vaccine, Mason is also offering testing for COVID-19. Testing is available to all members of the Mason community, regardless of vaccination status.

As the winter break approaches, Mason is working to ensure that our community is safe and healthy. We encourage all members of the Mason community to take the necessary precautions to prevent the spread of COVID-19.

Thank you for your continued support and cooperation. Together, we can make Mason a safe and healthy place for all.

Barry Klinger, Dean, College of Science
