Message from the Dean
FERNANDO A. MIRALLES-WILHELM

Planetary evolution

Have you ever watched the short film, "The Man Who Planted Trees"? It’s a moving story about the power of human action and how our efforts can create lasting change.

In the film, we see how a single person’s actions can create a forest that eventually becomes a national park. This story is a reminder of the power of human action and how our efforts can create lasting change.

Christmas and New Years aren’t the only times to think about our ecosystems. With each choice we make, we have the potential to shape the planet we live on.

The Office of Student Scholarship, Creative Activities and Research (OSCAR) holds its Fall Virtual Celebration December 9 - 10, 2021

Join fellow faculty and staff for Mason's 2021 holiday party on the Fairfax Campus. Enjoy food, music, games, and prizes.

The last College of Science newsletter in 2021 will be on Wednesday, December 15. In 2022 we will continue to publish this newsletter on Wednesdays with a content deadline of the Monday prior to publication.

Events Happening at Mason

Mason's COVID-19 surveillance testing site will be open for two Mondays during winter break, on December 20 and 27.

Mason's vaccine site will be open Monday through Friday, from 7:00 AM to 7:00 PM on December 20 and 27.
