DHS Forms Call for Engineering Secure Environments

The Department of Homeland Security’s Science and Technology Directorate’s Homeland Infrastructure Resilience Evaluation (HIRE) team released a call for proposals on Monday.

The university will work with other academic institutions and experienced analysts that can tie together the multiple threads generated by the tools. As you might expect, he noted that we need tools. Just as importantly, he also described the need for knowledgeable community working amidst the flood of data that is our current world. The documentary powerfully chronicles the groundswell of researchers who are writing a new science of intelligence. In case you missed it, watch Marie Tillyer: “Open Source Data and Predictive Modeling for High-Density Crime Areas”.
