Mason President and Science Dean: Onward & Upward at Women Building Bio

Mary Mason and Science Dean Fernando Miralles-Wilhelm discuss and celebrate the second annual Women Building Bio Conference, held on September 16, 2020. The conference included a panel discussion featuring four leading experts, as well as a keynote address by Dr. Kinter. The event was held virtually and drew widespread interest from Mason faculty and students.

Research & Discovery

The College of Science at George Mason University is funded $32 million in research grants in the 2020 semester, which is the largest amount ever awarded to the college in a single year. This achievement is the result of the college's commitment to excellence in research and discovery, as well as the efforts of its faculty and students. The college has also been recognized for its contributions to the scientific community and its impact on the world.

Mason Science Community

GGS Department recognizes students for academic excellence

The Geography and Geoinformation Science (GGS) Department at George Mason University recognizes seven exceptional undergraduate and graduate students for their academic achievements at the 11th Annual Student Awards Celebration on Tuesday, September 24, 2020.

Science instructional growth and creative engagement

Jim Farley, Director of the Center for Teaching and Learning Excellence at George Mason University, recognizes the importance of creative engagement in the classroom and the role it plays in student success. Farley highlights the innovative teaching approaches used by Mason faculty to engage students and promote active learning.

Features

Inclusivity

The College of Science at George Mason University is committed to promoting diversity, equity, and inclusion in all aspects of its operations. The college has taken several steps to ensure that its programs and activities are inclusive and welcoming to all students. This includes providing support and resources for underrepresented groups and fostering a culture of respect and understanding.

Science Today

The College of Science at George Mason University is home to several distinguished scientists and researchers. These individuals are working on cutting-edge projects and making significant contributions to the scientific community. Their work spans a variety of fields, including biology, chemistry, physics, and mathematics.

Science Connect

Mason's Institute for BioHealth Innovation and the College of Science are sponsoring the upcoming VA Medicine Network Women Building Bio program, which is set to conduct an ambitious high time resolution survey of the entire sky visible with a nanohertz gravitational wave detection. The program will be held on September 16, 2020, and will feature several keynote presentations and panel discussions.

Wellness

Mary Ellen O'Toole, Assistant Director of International Health at George Mason University, discusses the college's efforts to promote global health and wellness. She highlights the college's initiatives and programs, which are designed to support the health and well-being of students and faculty around the world.

In this section, we will explore some of the cutting-edge research and teaching initiatives taking place at the College of Science. We will also highlight the excellence of our students, faculty, and staff, as well as the college's commitment to diversity, equity, and inclusion.
