Science instructional growth and creative engagement

Hello Science community,

The College of Science's fall semester began recently and we hope all of our students, faculty, and staff are settling into the semester.

With all of the challenges we've faced this year, it is especially refreshing to see the continued growth of the College of Science.

Some of this growth is due to new academic programs, such as climate dynamics, neuroscience, and forensics. However, we are also seeing growth in our current programs.

This growth has been reflected in our Science Connect newsletter, which highlights the achievements of our students, faculty, and staff.

We are proud of the College of Science's contributions to Mason's overall research growth and creative engagement.

Let's continue to support our College of Science and its programs, and let's celebrate our achievements.
